

## **HOMEBOUND INSTRUCTION (Policy 6004)**

Upon request, KTEC High School administration shall provide homebound instruction to students based on need. Homebound instruction is an educational support that is provided to students who are unable to attend school due to medical reasons. Students who have been confined to their home or a hospital may be eligible for homebound instruction due to a physical disability, illness, medical situation, or psychological or psychiatric reason.

Homebound services are meant to support core academics during the absence, not replace general instruction. Instruction will be provided in core academic areas that do not require specialized equipment or laboratory work. Homebound services will be provided virtually or in person, determined on a case-by-case basis to prioritize the health and safety of the student and KTEC High School staff members.

To request homebound instruction, a written request should be made to the Principal of KTEC High School. A statement from a licensed medical practitioner shall be included that describes the student's need for homebound instruction as well as the estimated length of time the student will be absent from school.
