**RE: Lead Water Sampling – Saint Mary's KTEC High School, 7400 39th Avenue
Kenosha, Wisconsin**

Dear Mr. Hejnal:

AP Environmental, Inc. was asked to retrieve water samples from Saint Mary's KTEC High School and have them analyzed for lead. On Friday May 16, 2025, Anthony Kaprelian Wisconsin Certified Lead Risk Assessor (#LRA-3579) performed the water sampling.

No level of lead is safe in drinking water and area(s) that are of concern should be continually monitored for lead. The Federal and State standards have been established or Action level for lead in drinking water is 15 ug/l (parts per billion) lead, KTEC High School has result(s) above the Action level. Sampling was performed by taking the first draw and then a two-minute flush of the system, in various areas in the school.

The samples were submitted to Pace Analytical Services, LLC, 8 East Tower Circle, Ormond Beach, FL 32174, for analysis.

Project # AP25-169

HIGH LEAD LEVEL AREA(S) SHORT TERM CONTROL MEASURES

No Areas of concern at the time of the testing on Friday May 16, 2025.

- flushing the suspect area every morning and letting the water run a minimum of fifteen minutes.
- adding a water filter to the contaminated area (must be maintained and replaced).
- using bottled water.

HIGH LEAD LEVEL AREA(S) PERMANENT CONTROL MEASURES

No Areas of concern at the time of the testing on Friday May 16, 2025.

- replacing the lead pipes in the contaminated facility.
- automatic flushing system (flushes main pipes or headers of the system)
- permanently disconnecting water source

AREAS OF CONCERN

No Areas of concern at the time of the testing on Friday May 16, 2025.

- flushing the suspect area every morning and letting the water run a minimum of fifteen minutes.
- adding a water filter to the contaminated area (must be maintained and replaced).
- re-test these area(s) every year.
- using bottled water.
